### **Private information of MLP applicants**

Please be advised that in an effort to safeguard the private information of all MLP applicants, after a loan has been approved or denied and everything has been entered and uploaded into the MLP database, you should dispose of all documentation you have gathered that contains private and/or confidential information of the friend or neighbor who has applied for the loan.

The loan documentation is encrypted in the MLP database. You can access this information should you need it after the loan has been approved or denied.

We advise that the only information you keep in your personal records is the name and contact number of each individual.

We appreciate your due diligence in this matter.

Sincerely,

Louise Bland, MLP Leader
